Make every second count

Designed for Efficient Emergency Response

Set up your emergency office in seconds with Thuraya IP. Requiring no additional software, your team in the field can be instantly connected to headquarters, making urgent decisions and crucial operation coordination more efficient.

Whether directing relief efforts, synchronizing evacuations or liaising urgent medical assistance, Thuraya IP is tailor-made for effective, reliable communications. And when you need to facilitate group emergency communications across different technologies, Thuraya's NettedComms solutions provide all the functionality you require.

- Reliable network providing quality communications – the Thuraya network dynamically allocates bandwidth where needed, ensuring uninterrupted and congestion-free communications
- Swiftly deployable terminal – instant network acquisition, easy to install and use. Set up a remote office instantly.
- The only terminal with asymmetric flexible uplink/downlink bandwidth speeds; cost-effective – pay only for the bandwidth you use
- Ultra-portable: A5 size - 1.3 kgs with battery – easily slips into a rucksack
- World's smallest modem to support 384 kbps Streaming IP and 444 kbps Standard IP
- Simultaneous voice and data applications
- 24/7 connectivity with our fixed fee unlimited usage data packages
